To whom it may concern,

**RE: Letter of recommendation**

I have been asked to provide a letter of recommendation by Mr Karbowskiak of TWK Scaffolding, who has partnered with us on our last two successive projects at Barton Peveril Sixth Form College for my team and on several other projects for the Amiri Construction Group.

I have found Mr Karbowskiak and his team operate in a collaborative, professional and safe manner. TWK provided assistance at the beginning of both projects in ensuring we had scheduled the works correctly ensuring that the access we requested was suitable for the tasks in question. TWK have a very knowledgeable team and their experience has ensured that the construction process has gone smoothly, but also that the need for variations has been minimal. They have also met every deadline we have agreed on.

Any additional works required have been valued fairly and reacted upon swiftly if required.

Throughout the process, Tomas has ensured that we are satisfied with the service provided by TWK. Also, I have felt very comfortable in seeking advice from them if a challenging access requirement has arisen.

The operatives work in a safe manner and TWK provide their ops teams with company branded clothing which adds to the air of professionalism of the company.

Safety protocols are dealt with digitally and this aids in the management process for our team.

I would have no issue with recommending TWK to any other contractor seeking their services and we will continue to maintain our relationship with them well into the future,

Please do not hesitate to contact me should you require further information,

Kind regards,

**Tom Meaden**
