Subject: Testimonial for TWK Scaffolding's Proactive Approach to Health and Safety and Recent NASC Accreditation

To Whom It May Concern,

I am writing to provide a testimonial for TWK Scaffolding, a valued client of Simian Risk Management. We have had the pleasure of working with TWK Scaffolding for some time, and I am pleased to commend their proactive approach to health and safety management.

TWK Scaffolding's commitment to maintaining the highest standards of safety is clearly evident in their recent achievement of securing NASC membership. This accreditation is a testament to their dedication to upholding best practices within the scaffolding industry and their continuous efforts to improve safety standards on-site.

Throughout our ongoing relationship, TWK Scaffolding has consistently demonstrated a collaborative approach to health and safety. They actively engage with us for guidance and support on day-to-day health and safety queries, ensuring that their operations are fully compliant with current regulations and industry standards.

In addition to their commitment to daily health and safety management, we have also recently conducted training for their operations and office staff on harness inspections. This proactive approach to training and safety reflects TWK Scaffolding's commitment to not only meet but exceed the health and safety expectations within the scaffolding industry.

We look forward to continuing to support TWK Scaffolding as they maintain their high standards of health and safety management and enhance their operational practices further.

Yours sincerely,

Jamie Lyons
Consultancy Manager/Senior H&S Advisor
SIMIAN Risk Management
